---

There is no current program for enforcement of the anti-lidding bylaw.
Whereas a second phase related to the monitoring is needed to assess and formulate an action plan from a practical standpoint

Whereas air quality issues are the responsibility of all levels of government and industry

Therefore, be it resolved,

That the City of Hamilton formulate a multi-level legislative approach in implementing a plan of action conducive to a multi-formulated approach for real time air monitoring in the City of Hamilton with the participation of industry representatives and other levels of government

3. Public Health Services Response to report: Health-Impacting Air Pollutants: A Mobile Monitoring Study to Identify and Rank Sources in Hamilton, Ontario (no copy) (Item 5.2)

That the response by Public Health Services to report: “Health-Impacting Air Pollutants: A Mobile Monitoring Study to Identify and Rank Sources in Hamilton, Ontario”, be received.

4. LEED Silver Certification – City Hall Renovations
   Anti Idling By-law

   (a) That costs for achieving LEED Silver Certification as part of the City Hall Renovations be brought back to Council for their consideration;

   (b) That costs involved in implementing a City of Hamilton anti-idling by-law be updated and referred to the 2007 budget process;

   (c) That a method be developed analysing the impacts of City policies, programs and projects, as they relate to air pollution and climate change and be included in the Phase 2 Plan;

   (d) That the City undertake an inventory of air pollutants and greenhouse gas emissions.

   (e) That the City continue to support programs and partnerships that educate an initiate action to improve the local air quality and reduce greenhouse gases within the Corporation and in the City of Hamilton
