Re: Highway 52 and Jerseyville Road Intersection Improvements (PW08041) (Ward 14)

Council Direction:
N/A

Information:
The purpose of this Information Report is to provide a status update with respect to the Highway 52 and Jerseyville Road Intersection Improvements Study.

The responsible Division for determining the feasibility of a roundabout at Highway 52 and Jerseyville Road (Item ‘C’ from the Outstanding Business List of the Public Works Committee Agenda) has been changed from Operations & Maintenance to the Capital Planning & Implementation Division.

The Highway 52 and Jerseyville Road (Appendix A, location map) Intersection Improvements is being led by the Environmental Planning Section, with support provided by the Traffic Engineering & Operations Section. The Environmental Assessment process is being followed, including public consultation. Due to the public consultation being conducted, it is being requested that the due date for the conclusion of this Study be adjusted from March 31, 2008, to May 26, 2008.

The request for the due date change for the conclusion of this study is based on the anticipated completion of the Environmental Assessment process. A Public Information Centre was held on March 4, 2008, to present the alternative solutions to the intersection and to present the preferred solution (Roundabout). An Environmental Report will be available for endorsement by Public Works Committee by May 26, 2008, (Council approval on May 28, 2008) and is anticipated to be filed by late May, allowing the thirty day review period to be concluded late-June. Due to the expected timing of this project, conclusions of this study are anticipated to be made available to the Public Works Committee on May 26, 2008.
