Subject: Wind Towers In Hamilton

The Mayor and Councillors

I call upon you and all Councillors to support the Motion to Rescind the Moratorium to be introduced by Councillor Judi Partridge. It is essential that Council supports the development and construction of wind towers in Hamilton. The need for clean renewable energy is pressing. The need for sustainable well paying jobs is self evident.

Hamilton has the ability to be a leader in green energy technology. By taking a strong supportive position for the development and construction of wind towers will prove that the city is open for business for this emerging industry.

Please support the upcoming resolution to rescind the moratorium for all areas of the city with the exception of Glanbrook.
