Peter De Iulio, Senior Project Manager, Development Planning, addressed Committee respecting Report PED11064. Mr. De Iulio’s comments included, but were not limited to, the following:

- Changes from the concept that was before committee on May 17, 2011:
  - Down from 95 units to 90 units.
  - Plan includes 14 street townhouses on Valiant Circle up from 11.
  - 25 2-storey block townhouses – 1 less that what was in the staff report.
  - 23 3 storey towns which is 3 less than plan
  - 28 maisons – 4 less than staff report.
  - Elimination of access to Valiant Circle, inclusion of right-in, right-out access to Binbrook Road.
  - With reduction of 8 units in the larger block – visitor parking ratio has increased from 0.61 per unit to 0.67 per unit.
  - Entire larger block will be subject to future site plan control application, which will include the layout, parking, landscaping, and internal sidewalks.

- Unique situation – a stand alone project, which was weighed on its own merits.
- It does meet the density figures, but not the building type.
- Maisons are effectively a form of an apartment building.

Leanne Cunliffe, Project Manager, Traffic Planning was available to answer questions respecting traffic control issues within Parkside Village plan.

The staff presentation, respecting the Applications for Amendments to the Glanbrook Official Plan and Zoning By-Law No. 464 for Lands Located at 310 Fall Fair Way, was received.

Stephen Armstrong, of Armstrong Hunter, addressed Committee respecting the Applications for Amendments to the Glanbrook Official Plan and Zoning By-Law No. 464 for Lands Located at 310 Fall Fair Way. Mr. Armstrong’s comments included, but were not limited to, the following:
• Existing zoning and designation allows, as of right plan, a total of 102 units. One of the two plans illustrates 3-storey apartments with flat roofs, which from a design point of view are inferior to the pitched roof.
• 3-storey stacked townhouses that are currently permitted under the By-law.
• Standard 2-storey townhouse development that is permitted under the medium density.
• Surface parking, buildings are approximately 9 meters back from the road. Wants to try to create a street presence.
• Believes it’s a good product and development that should be encouraged in Binbrook and the City of Hamilton.
• As of right plan – only subject to site plan approval that wouldn’t involve the Committee or public consultation.
• Wants to see the revised concept come forward.
• An example of a three storey apartment with a pitched roof was shown, but cannot be done with under the existing zoning, as the roof pitch is too high. A minor variance would be required.
• 95 unit proposal was revised to 93 units and added more parking.
• Plan was revised to remove the driveway from Valiant Circle and added additional units.
• Was able to add the driveway in terms of a right-in and right-out.
• Basically there has been a reduction in the units and more visitor parking has been added (38 visitor parking spaces would be required, currently showing 51 spaces), which is internal parking for condominium complex.
• Plan shows mixed use, medium density, pedestrian prominent.
• In summary, applicant is very supportive of the development, and believes proposal before Committee is appropriate, and is supportive of amendments for access and units.
• Staff will report back with a revised zoning by-law, not a lot of changes to be made, just minor amendments.

Fred Losani, Losani Homes, addressed Committee respecting the Applications for Amendments to the Glanbrook Official Plan and Zoning By-Law No. 464 for Lands Located at 310 Fall Fair Way. Mr. Losani’s comments included, but were not limited to, the following:

• Two years have passed since he first came forward with plan that was already a right of plan.
• Came forward to create a plan that would address the concerns of the area residents.
• Options are to go to the OMB, as the development is a right of plan.
• The applicant’s preference is what’s before Committee now.
• Applicant has tried to address as many concerns as possible while staying true to the concept and the design guidelines.
The design is pedestrian friendly.
Councillor Johnson asked that if the application was denied, was Mr. Losani willing to go to a completely different design. Mr. Losani replied that it would be his intention to go on dual path. He would submit an appeal to the OMB; and, begin work on the applied plan, based on the existing site plan. A new sight plan would require the process to start from the beginning again. The applicant would not come forth with another application, as the dual options would be definitive.
Can get site plan through in as little as 8 weeks. There is certainty there.
With the Official plan having been adopted at this point, the model is already in place for Binbrook Road and Highway 56 to be developed that way.
Pretty consistent with what was originally planned for Binbrook Road.
Secondary side-walk on Valiant circle – sidewalks are currently slated for the south side; however, residents have put a petition in requesting additional sidewalks. There are no driveways along that stretch. Should additional sidewalks be required, it would cost $55/sq. meter to put in sidewalks for the Municipality (is protocol).

(iv) **Application for Approval of an Amendment to Hamilton Zoning By-law No. 6593 for Lands Known as 480 Stone Church Road East (Hamilton) (PED11088) (Ward 7) (Item 6.4)**

Delia McPhail, Planner, addressed Committee respecting Report PED11088. Ms. McPhail’s comments included, but were not limited to, the following:

- The application before the Committee is to expand the range of commercial uses permitted within the existing building, located at 480 Stone Church Road East, and to reduce the required parking on site.

- The subject lands are located at the southeast corner of Stone Church Road East and Upper Wentworth Street in Hamilton, and are approximately 0.43 Hectares in size.

- The subject application is basically twofold: to permit additional commercial uses, including Medical, Business, Professional Office and Retail Uses and to reduce the parking on-site by 2 spaces, bringing the total number of parking spaces provided on-site to 74.

- The surrounding neighbourhood is comprised of residential uses, including single detached and townhouse dwellings.

*Council – June 15, 2011*
Planning Committee Report 11-011

• Single detached dwellings front onto Stone Church Road, east of the subject property.

• The lands to the north of the subject property are single detached dwellings that back onto Stone Church Road East.

• The lands to the west are also townhouses.

• Single detached homes are located to the south of the subject property.

• The subject Lands are at the corner of Stone Church Road East and Upper Wentworth Street

• Four photos of the subject lands were shown to Committee, illustrating the following:

(i) The subject lands at the southeast corner of Stone Church Road East and Upper Wentworth Street;

(ii) A view of the parking lot on the eastern portion of the subject lands;

(iii) A photo depicting the building on the subject lands from the east; and,

(iv) a photo taken from the opposite side of Upper Wentworth, looking northeast towards the subject property.

• Preliminary Circulation was sent to 322 property owners and a Public Notice sign was placed on the property at the beginning of April. 2 letters were received from adjacent residents to the south and their concerns regarding the range of commercial uses sought were relieved upon the application being amended to add only medical, professional, and business office, as well as retail uses.

• The proposal has merit and can be supported since it is consistent with the Provincial Policy Statement, and it conforms to the Growth Plan, Hamilton-Wentworth Official Plan, and City of Hamilton Official Plan. The proposed development is considered to be compatible with, and complementary to, the existing and planned development in the neighbourhood, and represents an efficient use of land and services within the urban boundary.

• In 2004, the Ontario Municipal Board approved the necessary minor variances to allow for the construction of the mixed use...
building and the provision of 76 parking spaces, serving the commercial and residential uses located within the building.

- A site plan was finally approved in January 2007, however, the construction technique used for the building resulted in a revised parking layout that could only accommodate 74 parking spaces.

- The reduction in parking is due to the construction technique used for the building. The parking layout changed and resulted in the loss of two parking spaces. Ultimately, it means that 1 parking space per dwelling unit and 10 visitor parking spaces will be provided.

- Based on the square footage of the commercial space within the building, the retail use and business and professional office uses do not require parking, however, the medical office use has been restricted to 190.0 m² as the parking requirement for that use would be 10 spaces.

- A Holding provision has been applied to the zone should an office use be proposed, as the owner will be required to go through the site plan amendment process to ensure staff’s satisfaction of the parking arrangements.

- Staff is of the opinion that suitable alternatives to automobile use are available to mitigate on-site parking pressures. The commercial uses will also serve the needs of the surrounding area and are not destination-oriented. Therefore the reduction in parking can be supported.

- The “E-2” parent zone does not restrict residential uses to be above the ground floor. The applicant wished to locate the superintendent’s dwelling on the ground floor and Staff deemed it appropriate to restrict its size, in light of the Urban Official Plan policies.

Ted Valeri, Owner, and the Linas Saplys, Agent, were in attendance to answer questions, as required.

- Ms. Chioini lives directly next to the property.
- The parking area is right outside her dining room window, and there is an large empty space that looks like a carport that is currently being used for parking, storage of large garbage bins and stopping/parking for delivery trucks.
- There is supposed to be green space between her property and the property in question. Ms. Chioini is concerned that people will simply use this area to take their dogs; making it a dog waste area.
- The sidewalk was constructed and ended at her property line right in the middle of her driveway.
- The lights from the parking lot in the back glare directly into her bedrooms and kitchen area. There are parking lights, people talking in the parking lot and the beeping of car entry/locking devices.
- People are cutting between the two buildings, smashing bottles. Ms. Chioini is concerned with security and vandalism.
- Suggested a fence to close off access between the two properties and a fence at the back of the apartment/convenience store property to deter people from cutting through between properties.

Ms. Chioini was also advised by Committee that there is a City road allowance at the front of her property and that there are illegal issues with respect to her property.
