P&E Committee:

Any person who owns a store should be free to choose his hours of operation, days open and days closed. No City should have the right to dictate these things. Similarly to Nut Allergies, if a business decides to allow Smoking a simple warning sign at the door would be sufficient for customers to decide if they wish to enter. There is far too much intrusion in our lives by all levels of Government and people who should be minding their own business.

GM Baker
