Hello Ida, I had hoped to attend the presentation scheduled for July the 9th but other commitments have prevented me from doing so. I am writing you because it is absolutely imperative that Hamilton immediately cease fluoridating its water. The practice is completely unlawful by any measure of the word. It’s tantamount to forced medication and is a violation of patient’s rights. Health Canada attempts to skirt this fact through semantic manipulation, which I find entirely unethical. Any criticism of the procedure is met with the same standard reply drafted and canned by bureaucrats who are seemingly completely ignorant of the scientifically verified side effects and health risks associated with consuming fluoride. I’m sure that my colleagues will do their best to inform you of all the issues and I hope that some progress will finally be made. We all deserve a better standard of living and removing fluoride from the public water supply is a simple and easy way to improve the general health of your citizens as well as put some much needed funds back in to the public purse.
