II. Non-Metered Water Customers

The non-metered annual wastewater/storm rate is $467.60 per annum, plus applicable taxes.

Note: The non-metered annual water rate for water supplied by the City of Hamilton is $461.62 per annum, plus applicable taxes, for a combined total non-metered water and wastewater/storm annual rate of $929.22 per annum, plus applicable taxes.
1. (a) Application Processing Fee (Section 10) $374.50 plus applicable taxes and full cost recovery for peer review, if required by Director

(b) Annual Administration Fee (where annual Abatement exceeds $500.00 -sub-section 22(b)) $573.10 plus applicable taxes

2. In determining whether a Consumer appears to qualify for an Abatement under this By-law, the Abatement shall be calculated in accordance with the following formula, based on data from the calendar year prior to the year of application for the Abatement:

\[ A = \text{annual volume (m}^3\text{) of water supplied to the property from all sources} \]

\[ B = \text{annual wastewater diverted from the City’s sanitary sewer and combined sewer system (if B is less than 25% of A, the Consumer is not eligible for the Abatement; if B is greater than 75% of A, insert a value equal to 75% of A)} \]

\[ C = \text{annual wastewater discharged to the City’s sanitary sewer and combined sewer system (C = A – B)} \]

\[ D = \text{infiltration and inflow add back (D = C x 133%; add back adjustment of 33% to the volumetric charge so that all ratepayers continue to pay an equal portion of the treatment costs associated with inflow and infiltration)} \]

\[ E\% = \text{wastewater Abatement in percentage} \]

Step 1: \[ A – B = C \]

Step 2: \[ D = C \times 133\% \]

Step 3: \[ E\% = \frac{(A – D) \times 100}{A} \]
3. If an Abatement is authorized for a Consumer in accordance with this By-law, the Abatement will be applied quarterly each year in accordance with the following formula:

\[
\begin{align*}
F &= \text{actual volume (m}^3\text{) of water supplied to the property by the City during the previous quarter} \\
G &= \text{volume (m}^3\text{) of water eligible for the Abatement during the previous quarter} \\
H &= \text{wastewater/storm treatment charge (see Schedule “A” to this By-law)} \\
$I &= \text{dollar amount of Abatement for the billing period}
\end{align*}
\]

Step 4: \[F \times E\% = H\]
Step 5: \[G \times H = $I\]
