I am not sure anyone has addressed the fact that there are millions of us out here who become ill with any type of fluorinated chemical. And millions of people world-wide who are disabled with MCS (Multiple Chemical Sensitivities) cannot shower in fluoridated water, eat anything cooked in it, never mind, drink it. The fluoride industry would have you believe that absolutely no one can have any adverse reactions to fluoride. Well, I am here to tell you they are absolutely wrong. Now, you can take the word of a group of people who want to continue to make money or you can take the word of those it is actually affecting.

I cannot believe anyone at this particular time in history would be saying that adding chemicals to anything is helpful with all the knowledge we have about the harmful affects of all chemicals (not already naturally in the body). The only people who would do this stand to make money from them. No one with common sense and any amount of compassion would inflict them on people who they know will become ill from them.

I have not been able to travel to your country because of the fluoridation. I am not able to travel freely within my own country because of it. I am fortunate my own community had the foresight to pass a bill saying nothing should be added to water except to make it potable. Water should remain pure. It is a simple concept. For everyone’s health, please keep all water pure.

Thanks for listening,

Bobby McClintock, Honolulu, Hawaii
