<td></td>
</tr>
<tr>
<td></td>
<td>There were no comments received from the Committee members regarding the Planner’s Working Group minutes and binder information.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Item #15 Diane Bloomfield notified CTC that the HHSPC agreed that CTC will complete the threat assessment within the issue contributing area of the Georgetown wells and develop draft policies for Halton-Hamilton Source Protection Committee to review.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Gavin Smuk contacted the agricultural reps of Saugeen, Grey Sauble, Northern Bruce Peninsula Source Protection Committee to obtain clarity about their letter and motions. On the Nutrient Management Act motion, the Halton-Hamilton Source Protection Committee noted that it has a preferred policy direction that has a different affect than the motion and which is considered a better approach. On the Environmental Farm Plan motion, Gavin indicated that the farm organizations have already begun to develop a model for a “Risk Assessment Tool &amp; Implementation Plan”; therefore, the resolution</td>

| HHSPC 11-07 | Moved by: Gavin Smuk  
Seconded by: Barry Lee | Diane Bloomfield was requested to write a letter to the Saugeen, Grey Sauble, Northern Bruce Peninsula Source Protection Committee stating H-HSPC motion. |
| HHSPC 11-08 | Moved by: Gavin Smuk  
Seconded by: Barry Lee | Carried |
| Chairs’ Meeting Update – Diane Bloomfield | | |
| A Chairs’ meeting was held on March 7 and 8. Doug was unable to attend. Representatives from the Ministries of the Environment and Natural Resources spoke on:  
- Dense Non-aqueous Phase Liquids  
- Aggregate Resources Act Instruments  
- Permits to take Water.  
Break out sessions occurred the second day to discuss approaches to certain threats. Most SPCs are focusing on significant threats. Planners from the SPA/SPR attended this session and requested to attend more meetings to continue the dialogue on policy development.  
The Ministry of the Environment is creating an Excel work sheet that will help each region with the uploading of their policies to a common database. The database will be stored on the Conservation Ontario website and will include all the required policy components. Project managers, Chairs, planners and staff have access to the existing CO web database which facilitates the sharing of information.  
Q. Why is access to the Conservation Ontario web policy database restricted?  
A. Giving people access to the threats section, gives them access to everything that is on the website.  
Doug will enquire about access to the threats on the Conservation Ontario website at the next Chair’s meeting.  
There are still a few more threat bulletins to come from the Ministry of the Environment. |
<p>| Presentation by Hazel Breton, Manager, Water Resources Engineering, CHA | | |
| There are climate change models on the Environment Canada website for Canada and on the Ministry of Natural Resources for Ontario but they are just now creating models for local areas. Climate Change affects agriculture with either too much or too little water; health as tropical diseases are moving north as the temperatures rise; and the | Update: Read only access to the web database has been given to all SPC members. |</p>

<td>Ecosystem and climate change strategies</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The province of Ontario, Conservation Authorities and cities are creating strategies to prepare for climate change. The Ministry of the Environment is ensuring the data is collected. Climate change policies should be consistent across the province. Ground and surface drinking water quantity and quality will be considered by Hamilton CA and the City of Hamilton when developing climate change programs.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Roy explained the roll of CIELAP’s Ontario Drinking Water Stewardship Program in Burlington, Desoronto and Campbellford areas. Its purpose is to raise awareness of where drinking water comes from and what residents and small business owners in Intake Protection Zones can do to protect source water. A brochure to raise awareness and provide some best management practices has been produced, which will be mailed to 200 small businesses in Burlington. In eastern Ontario, the program has been linked to a rain barrel program. An article on the CIELAP stewardship project will be in the Conservation Halton Focus newsletter. CIELAP project partners have and will be attending different water events in the area until June 1st when the program ends in the Burlington area. It was suggested that Twitter be used to disseminate information. An Open Editor article to Rob Howard at the Hamilton Spectator may also help and COGECO 23 in Burlington may be looking for topics. An ad is going in the Burlington Post directing readers to the CIELAP project website. The program could be expanded to Oakville and Hamilton. Boating season may be a good opportunity to raise awareness about lake intakes and source water. Concerns were voiced of using the Halton-Hamilton Source Protection logo on advertising material for this project. CIELAP and Burlington Green are considered activists by some and the brochures may not be read. Diane informed the committee that speaking requests are being received and we are participating at various events. Roy is updating the Strategic Communications Plan according to the regulated requirements and to our schedule. The process of introducing the Source Protection Plans to the public was explained.</td>
<td></td>
</tr>
<tr>
<td>10.</td>
<td>Risk Management Official update – Chris Shrive and David Simpson</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Dave Simpson sits on the MOE Working Group for risk management training. David and Chris will develop business plans to take to their respective Councils, setting up the risk management official and inspectors’ office and the funding mechanism. There is the possibility of the partnering of a Risk Management Inspector with a local Conservation Authority representative when visiting a property. The MOE is working on a pilot training course scheduled for May 9 to 18 and local municipal staff may attend. There will be more training sessions once the course has been finalized. Q. What department will the RMO fall under? A. Hamilton - Do not know yet, possibly building or public works.</td>
<td></td>
</tr>
<tr>
<td>11.</td>
<td>Planning Update – Diane Bloomfield</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The discussion papers are being edited and compiled into Background Documents.</td>
<td></td>

</tr>
<tr>
<td>These documents will be sent out to the SPC in late May to be discussed at the June 14th meeting. They will show the approach that the policies will take. Policies will be written following the June meetings and the draft Source Protection Plans distributed in late August. The next step will be pre-consultation on the policies between September and December.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Notification of commencement of plan development</td>
<td>The notification letter to be sent to landowners was reviewed by the communications sub-committee and the Ministry of the Environment to ensure it met the requirements stated in the legislation. It has been approved by the Ministry. Approximately 600 letters will be sent out to landowners where significant threats are existing or could occur. A suggestion was made to soften the wording. The proposed wording was considered necessary to follow the requirements imposed by Regulation and to ensure the landowners are aware that the use of their land could be affected. A copy of the letter will be sent to the Halton and Hamilton municipal staff representative to be forwarded to each Council for information. The second last paragraph in the letter was amended. HHSPC 11-09 Moved by: Turlough Finan Seconded by: Peter Ashenhurst That the notification letter be accepted, as amended and mailed. Carried 9 in Favour, 1 Opposed</td>
<td></td>
</tr>
<tr>
<td>Q. What if a property is missed in the mailing? A. The letter is sent to the addresses on file associated with municipal property records. Q. If a wellhead protection area changes, how do we inform new residents? A. Depending on the changes, we may be required to consult again through newspaper ads and letters.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Kelso Campbellville Tier 3 water budget update– Diane Bloomfield The Tier 3 water budget project is underway. Through a purchasing process to retain a consultant, EarthFx was selected. An administrative meeting has been held to set timelines and discuss other administrative items. The Peer Review team also has to be selected. The GS Flow model will be used on this project as a coupled groundwater and surface water model is preferred. Funding for a Tier 3 for Greensville municipal well was put in the 2011-12 budget but will probably be postponed until 2012-13.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>13. Other Business - All Status of the Assessment Reports – There has been no feedback from the MOE to date.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>14. Comments from Attending Public None</td>
