- 011 RFQ Structure – New Approach to Procurement:
  - City will provide location, advertising and police presence (for traffic control).
  - City will not be subsidizing barrels.
  - Supplier is responsible for all payments and logistics.
  - Supplier will be responsible for organizing, set up, processing, teardown and transportation.
  - City will undertake follow up surveys to obtain citizen feedback.

- Alternatives:
  - Remain with rebate structure, as used in 2009/2010.
  - City could procure and sell units at City’s own store front.
  - Staff does not recommend the above alternatives.
• New Alternative:
  • Rebate structure with provision for resident to purchase what and where they choose.
  • New specification to allow for safe, re-purposed barrels.
  • Staff recommends that they be directed to work with the industry to explore new options that meet the stakeholders’ needs, and delay City sponsored event until 2012.
  • With regard to the sale of re-purposed rain barrels – staff wants to ensure public safety by investigating sources for reused rain barrels that can be guaranteed to be contamination free, prior to making them available to the public.

The staff presentation, respecting the City Annual Rain Barrel Sale Update, was received.

Staff was directed to continue with the City’s 2011 Annual Rain Barrel sale, providing new rain barrels only at this time.
