The City of Hamilton is proposing a new program for the inspection of its Hybrid Vehicles for Escape. The acquisition of 0.17 Hybrid Vehicles will be part of a larger initiative to improve safety and efficiency. The new program will require the issuance of new vehicle identifiers. There will be a one-time cost of $71,466, followed by annual costs of $4,248.

The proposed program aims to enhance the safety and performance of the City's fleet. The proposed budget includes the purchase of new equipment and software to support the new program. The budget is expected to be approved by the City Council in the next fiscal year.

The program will be led by a team of experienced inspectors. The program will be reviewed annually to ensure its effectiveness and to make any necessary adjustments. The program will be monitored and evaluated by the City's Sustainability Committee to ensure that it meets its objectives.

The program will help to reduce the risk of accidents and improve the overall safety of the City's fleet. The program is expected to be completed within the next fiscal year.
