</table>

The Cemetery Care and Maintenance Trust portfolio underperformed relative to the policy because the portfolio was overweight in holdings of corporate and provincial bonds with very short maturities which underperformed relative to corporate and provincial bonds with longer maturities. Overall, the three Trusts did benefit from
holding Canadian Schedule I bank deposit Notes, longer dated Provincial bonds and Municipal bonds as yields generally decreased over 2010 and were lower as at December 31, 2010 relative to their values on December 31, 2009.

The current strategy is to continue to hold high quality credits, including Canadian Schedule I bank deposit Notes, Provincial and Municipal bonds. We anticipate interest rates to increase in 2011 and will look to add longer maturity bonds and high-quality corporate bonds on an opportunistic basis should rates increase appreciably and settle at an attractive level.
